

## 命令模式

---

CHDIR directory

Changes the current directory (folder).

改变当前文件目录。

## 参数说明

---

directory

A valid directory path which may include a drive letter. If spaces appear in directory it must be enclosed in quotation marks.

有效的路径地址，也可能包括盘符。如果路径地址中出现空格，则必须用双引号引起。

## Operation

### 操作

---

Finds the directory indicated by the given path specification and makes it the current directory.

根据路径说明找到路径地址，并把它作为当前目录。

If no drive prefix is given, the current directory on the current drive is changed to directory.

如果没有给定盘符，将采用基于当前路径的相对路径。

Two special shortcuts are available:

可以采用两种捷径：

1) To change to the original directory which was current when the program was started,

将目录改为当前程序开始时的原始目录。

CHDIR .START

2) To change to the directory where the program files are stored,

将目录改为程序文件储存的目录。

CHDIR .PROGRAM

## Output:

### 输出

---

none.

无

## Examples

### 样例

---

CHDIR \JOBS\87012

CHDIR K:\

CHDIR C:\PROJECTS

CHDIR "C:\GHS PROJECTS"
