

命令模式

ECHO [ON | OFF]

Enables/disables screen display of commands from a Run File.

可/否屏幕显示运行文件的命令

参数说明

ON | OFF

Turns command echoing on or off. If omitted, ON is assumed.

命令 ECHO 开或关，若省略，默认开。

Operation

操作

Initially, echoing is off. This means that as commands are taken from a Run File, the command lines themselves are not shown on the screen. After the ECHO command has been issued (with the ON parameter or without any parameter) the command lines are shown, or "echoed" to the screen when they are taken from a Run File. Note the ECHO OFF command itself is not echoed.

初始，ECHO 是关闭的，表示当运行文件时，命令不会显示在屏幕上。运行命令 ECHO 后（加参数 on 或不加任何的参数），命令会在屏幕上显示，或从运行文件中读出时，命令会被反馈到屏幕。ECHO OFF 命令本身不会被反馈。
