

命令模式

TCG tcg

Sets the total Fixed-Weight transverse center of gravity.

设置总固定重量横向重心

参数说明

tcg

The transverse coordinate, in current length units, of the Fixed-Weight center of gravity. If prefaced by an asterisk, the present value is incremented.

固定重量重心的横向坐标（以当前长度单位表示）。如果以星号开头，则现值递增。

Note: The Fixed Weight is the total vessel weight less the contents of tanks (but only those tanks which are being explicitly modeled).

注意：固定重量是船舶总重量减去舱室的液体（但仅限于那些明确建模的舱室）。

TCG can also be set with the WEIGHT, SOLVE and GMTMMT commands.

TCG 也可以使用 WEIGHT、SOLVE 和 GMTMMT 命令进行设置。

Operation

操作

If added weights are in existence (see the ADD command) then the center of gravity of the Light Ship is adjusted in order to achieve the total Fixed-Weight center of gravity.

如果存在加载的重量（参见 ADD 命令），则调整空船的重心以实现总重量的重心。

Display Output

输出显示

none

无

Examples

样例

Adjusting the Light Ship TCG for a total Fixed-Weight TCG of 0.5:

调整轻型船舶 TCG 以使总固定重量 TCG 为 0.5:

TCG 0.5
